

Relaunch of the Local Sites Partnership

What are Local Sites?

Local Sites are non-statutory designated sites which have been identified and selected **locally** for their **nature conservation or geological value**. **Local Wildlife Sites** play a vital role in our **local nature recovery**, providing refuges for our distinctive species and habitats for future generations.

What is the Local Sites Partnership?

The Local Sites Partnership (LSP) is responsible for designating Local Sites in four districts across North Merseyside, including Knowsley, Liverpool, St. Helens and Sefton.

The Partnership will comprise representatives from local authorities, Merseyside Environmental Advisory Service (MEAS), nature conservation charities, statutory agencies, consultant ecologists and local nature experts.

The LSP will bring together a wide range of environmental stakeholders with the goal to protect and conserve local habitats and wildlife in North Merseyside.

Relaunch Event

*You are invited to the relaunch of the
North Merseyside Local Sites
Partnership*

TIME: 10:00 – 12:00

DATE: 23/06/2021
